

**Supplemental Bid: Aggregates, Statewide
Attachment B: Special Terms and Conditions**

Method of Award:

The State anticipates that no single vendor can cover an entire region to meet the requirements under this solicitation. Therefore, awards will be made to the lowest responsive, responsible bidder per line item per region using the State Regional Planning Map, Attachment D. The State reserves the right to make multiple awards. Multiple awards may be awarded within a region to two (2) or more bidders to ensure complete delivery coverage to all geographical locations within each region.

- Prices are to be bid in the unit of measure requested (per ton or per cubic yard).
- Unit cost submitted shall include delivery up to twenty-five (25) miles round trip.
- The agency will pay a delivery charge of nineteen cents (\$0.19) per unit of measure (either ton or cubic yard) per mile beyond twenty-five (25) miles of delivery round trip, starting with mile twenty-six (26).
- The State reserves the right to reject any bid that has an inflated unit price for the aggregate.

Material Physical Specifications/Properties:

All specifications are subject to testing. Type of testing, frequency of testing, sampling procedures and laboratory to be determined by using agency personnel. Contractor agrees to pay all testing expenses. All materials found to be substandard must be removed from the area at the contractor's expense. Substandard materials will not count toward contract quantity.

Delivery Method:

All material is to be tailgate spread in an even fashion. Loads are not to be dumped in piles unless specifically requested by agency personnel.

Contractor shall be able to deliver within seven (7) calendar days lead time.

Delivery Trucks:

Contractor is to provide a minimum of six (6) trucks of 22-26 cubic yard capacity and must be capable of delivering total contract amount continuously or as weather permits. It will be permissible to utilize smaller capacity trucks in addition to the minimum number of large trucks. Tandem axle dump truck with a capacity of 10-14 cubic yards and/or triaxle dump trucks with a capacity of 14-18 cubic yards must be available upon request as some delivery locations dictate the use of these smaller trucks. All trucks must be in good working order.

******* Dump wagons are not acceptable for delivery of aggregates of any kind. *******

**Supplemental Bid: Aggregates, Statewide
Attachment B: Special Terms and Conditions**

Weigh Tickets:

Printed Tare/ Weigh tickets from a certified scale are required at the time of delivery. Deliveries will be refused without a printed weigh ticket. Contractor must provide weigh tickets indicating load weight for each delivery. With advance approval from the agency, an exception can be allowed in the event scales are unavailable. In that case the contractor must fully load each truck so that accurate volumetric measurements can be taken to verify the size of each load.

******* MINIMUM ORDER IS DEFINED AS A TRUCKLOAD OF MATERIAL. *******

The using agency reserves the right to weigh trucks before and/or after delivery, inspect material, measure actual dimension of materials in bed of truck, or use any feasible method to determine and verify the quantity and quality of materials being delivered.
